

Upgrade Notes 5.9.3 (Nuxeo Issue Tracker)

JQL Query: project in (NXP, NXCM) AND resolution = Fixed AND fixVersion = "5.9.3" AND ("Impact type" = "API change" OR "Upgrade notes" is not EMPTY) ORDER BY component DESC, key DESC

Sorted by: Component/s descending, then Key descending

1–14 of 14 as at: 11/04/14 12:02

Key	Summary	Upgrade notes	Components
NXP-14115	Include REST API in CoreServer	The REST API is now part of the core server. The Marketplace package nuxeo-rest-api does not exist anymore.	Rest API
NXP-13616	Improve file download on nuxeo api	<p>JsonDocumentWriter#writeDocument(JsonGenerator jg, DocumentModel doc, String[] schemas, Map<String, String> contextParameters, HttpHeaders headers) does not exist anymore it is replaced by :</p> <p>JsonDocumentWriter#writeDocument(JsonGenerator jg, DocumentModel doc, String[] schemas, Map<String, String> contextParameters, HttpHeaders headers, HttpServletRequest request)</p> <p>The generated JSON also changes and now includes a full URL to get the blob data :</p> <p>* Before :</p> <pre>{code} "file:content": { "name": "Nuxeo_Platform_5.8_administration_documentation.pdf", "mime-type": "application/pdf", "encoding": null, "digest": "4faa1208dbd8dce54db9174dabdec7db", "length": "11485973", "data": "files/80438e3b-48bb-42d1-9e08-9a0f54b8f945?path=%2Fcontent" }, {code}</pre> <p>* Now</p> <pre>{code} "file:content": { "name": "Meetup Docker.pdf", "mime-type": "application/pdf", "encoding": null, "digest": "f829ff57c289b60be5dd2c57adcf1d51", "length": "5980167", "data": "http://localhost:8080/nuxeo/nxbigfile/default/e596bd67-aaa5-4a43-a84c-bcf4850c4834/file%3Acontent" }, {code}</pre>	Rest API
NXP-13937	Add a widget template for sub images	widget template has been added at /widgets /image_subwidget_template.xhtml	Layouts & W
NXP-13826	Improve release scripts with commit message and unique build	<p>Customized commit messages used for all commits.</p> <p>New command "onestep" to prepare + perform (push and deploy) in one step.</p> <p>New option "--dryrun": improved dry run mode (previously only used via the "test" command).</p>	Infrastructure
NXP-13800	VCS: auto-generated integer ids on Oracle	<p>To activate, use in nuxeo.conf:</p> <pre>nuxeo.vcs.idtype=sequence</pre> <p>Or if you want to use another sequence than the default</p>	Core SQL St

Key	Summary	Upgrade notes	Components
		(HIERARCHY_SEQ), use: nuxeo.vcs.idtype=sequence:YOUR_SEQUENCE_NAME	
NXP-11551	Allow merged contributions for the repository config	<p>Configuration for repositories is now of the form:</p> <pre><extension target="org.nuxeo.ecm.core.storage.sql.RepositoryService" point="repository"> <repository name="default" factory="org.nuxeo.ecm.core.storage.sql.ra.PoolingRepositoryFactory"> <schema> ... </schema> <indexing> ... </indexing> ... (see http://doc.nuxeo.com/x/hwQz) </repository> </extension></pre> <p>When several contributions are made to the same repository name, they are merged.</p> <p>The old syntax that contributed to two extension points, org.nuxeo.ecm.core.api.repository.RepositoryManager (repositories) and org.nuxeo.ecm.core.repository.RepositoryService (repository) is still supported for backward compatibility but will emit a WARN message.</p>	Core SQL St
NXP-10182	Optionally use SQL arrays to store lists on PostgreSQL	<p>A given list field can be switched to database array storage using:</p> <pre><schema> <field type="array">some:field</field> </schema></pre> <p>To automatically enable database arrays for all list fields, use:</p> <pre><schema> <arrayColumns>true</arrayColumns> </schema></pre>	Core SQL St
NXP-14140	Make CoreSession thread-safe	<p>It's now possible to use the same CoreSession over and over in different transactions, and pass it between threads. Some constraints remain:</p> <ul style="list-style-type: none"> - it has to be closed properly, - it has to be used inside a transaction. 	Core
NXP-14118	Make sure the junit tests are run with user 'system'	<p>This impacts the junits runs. Now the principal 'Administrator' for the session injected in the tests as:</p> <pre>@Inject protected CoreSession session;</pre> <p>is an administrator: ((NuxeoPrincipal)session.getPrincipal()).isAdministrator() returns 'true';</p>	Core
NXP-14049	Allow setting perDocumentQuery=false through type service	<p>Instead of setting it through the repository reconfig, it's now possible (and recommended) to specify in the facet definition using the type service that a query on the facet (NXQL: ecm:mixinType = ...) will never need to match per-document facets.</p> <p>So instead of, in default-repository-config.xml, having:</p> <pre><neverPerDocumentFacets> <facet>SomeFacet</facet> <facet>OtherFacet</facet> </neverPerDocumentFacets></pre>	Core, Core SQL St

Key	Summary	Upgrade notes	Components
		<p>You should use in the extension point defining the facet:</p> <pre><extension target="org.nuxeo.ecm.core.schema.TypeService" point="doctype"> <facet name="SomeFacet" perDocumentQuery="false"/> <facet name="OtherFacet" perDocumentQuery="false"> <schema name="someschema"/> </facet> </extension></pre>	
NXP-13649	Configure PathSegmentServiceDefault maxSize through property	New framework property: <code>nuxeo.path.segment.maxsize</code>	Core
NXP-13148	Clean up session management	<p>To acquire a <code>CoreSession</code> (which should rarely be done in any case), you should now use the following pattern:</p> <pre>try (CoreSession session = CoreInstance.openCoreSession(repositoryName)) { // do something with session, including session.save() }</pre> <p>To do an explicit close if <code>try-with-resource</code> is not used as above, you should just call:</p> <pre>session.close();</pre> <p><code>CoreInstance</code> has a few other <code>openCoreSession</code> signatures to acquire a session for a given user or a system session.</p>	Core
NXP-13842	Tooltips > Replace jquery tooltips by tipsy tooltips	<p>From 5.9.3, Nuxeo does not embed jquery tooltip library anymore. It has been moved to <code>nuxeo-resources-compat</code>. Default tooltip library is <code>tipsy</code>.</p> <p>To enable a tooltip on any DOM element, specify the tooltip content in the 'title' attribute and add 'tipsyShow' css style class.</p>	Content View Ergonomy &
NXP-13877	Admin Center > Update connect icons and listing colors	delete <code>galaxy_admin_logo.png</code> and <code>100px_loading.gif</code>	Admin Center Style & CSS
